

IBM MarketScan dissertation support program

Providing complimentary access to private claims data for doctoral-level healthcare research

Important data for important research

IBM® Watson Health™ is pleased to support the education of future health services researchers and enhance the resources available for doctoral-level research in the US.

Through our dissertation support program, we offer no-charge access to the IBM® MarketScan® Commercial Claims Databases (including 2008–2010 data), which include:

- De-identified patient-level data reflecting real-world treatment patterns and costs
- Tracking of patients as they move through the healthcare system
- Claims, encounter, enrollment and drug data for millions of covered lives in the working population, including dependents

Faculty sponsors may apply on behalf of their students.

Statement of Good Security Practices: IT system security involves protecting systems and information through prevention, detection and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, misappropriated or misused or can result in damage to or misuse of your systems, including for use in attacks on others. No IT system or product should be considered completely secure and no single product, service or security measure can be completely effective in preventing improper use or access. IBM systems, products and services are designed to be part of a lawful, comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products or services to be most effective. IBM does not warrant that any systems, product or services are immune from, or will make your enterprise immune from, the malicious or illegal conduct of any party.
