IBM MarketScan dissertation support program
Providing complimentary access to private claims data for doctoral-level healthcare research

Important data for important research

IBM® Watson Health™ is pleased to support the education of future health services researchers and enhance the resources available for doctoral-level research in the US.

Through our dissertation support program, we offer no-charge access to the IBM® MarketScan® Commercial Claims Databases (including 2008–2010 data), which include:
- De-identified patient-level data reflecting real-world treatment patterns and costs
- Tracking of patients as they move through the healthcare system
- Claims, encounter, enrollment and drug data for millions of covered lives in the working population, including dependents

Faculty sponsors may apply on behalf of their students.
